EDUCATION

Maynooth University

Bachelor of Science in Computer Science & Software Engineering

Maynooth, Co. Kildare, Ireland

Expected May 2028

- **Second Year Result:** Second Class Honours, Grade 1 (2.1)
- **Relevant Coursework:** Data Structures & Algorithms, Software Engineering, Database Systems, Web Development, Computer Systems, Theory of Computation.
- **Activities:** Platinum MUSE Awardee (2026) | Generative AI Case Study Participant (2026) | Workday FFIT Participant (2026) | Dell STEM Aspire Mentee (2025)

EXPERIENCE

Women & Girls in STEM Facilitator

Feb. 2026 – Present

Maynooth University

- Deliver coding workshops to 50+ students, introducing HTML, CSS, and computational thinking through hands-on activities.
- Support students in solving technical problems by adapting explanations to different levels of programming experience.

Computer Science Summer Camp Demonstrator

Jun. 2026 – Jul. 2026

Maynooth University

- Delivered coding and UI/UX workshops, guiding 90+ students through programming and practical software development activities.
- Supported students with technical questions, debugging, and problem solving throughout hands-on workshops.

Computer Science Centre Tutor

Feb. 2026 – May 2026

Maynooth University

- Mentored undergraduate Computer Science students in Java, algorithms, debugging, and software engineering concepts.
- Reviewed code, identified implementation and logic errors, and guided students towards effective solutions.

Vice President, Women in STEM Society

Oct. 2025 – Jun. 2026

Maynooth University

- Co-led a 180+ member society, coordinating 15 technical, industry, networking, and professional development events.
- Collaborated with committee members and external organisations to connect students with technology professionals and STEM careers.

PROJECTS

Food Delivery Software System | *UML, Figma, System Testing*

2026

- Collaborated in an Agile team to design and test a multi-user food delivery system based on software requirements and user stories.
- Independently developed sequence diagrams modelling interactions between users, system components, and the database.
- Co-developed and executed system test cases, documenting test inputs, expected results, actual results, and identified issues.

Interactive Tribute Website | *HTML, CSS, JavaScript*

2026

- Developed a responsive interactive website featuring image galleries, animations, audio controls, and dynamic interactions.
- Implemented an image lightbox, DOM manipulation, event-driven interactions, CSS Grid/Flexbox layouts, and Canvas animations.

AI Accessibility Solution (Google Hackathon) | *JavaScript, OCR, NLP*

2025

- Collaborated during a 48-hour hackathon to build a prototype extracting text and identifying objects in video frames to generate spoken descriptions for visually impaired users.
- Applied OCR and NLP while contributing to implementation, debugging, testing, and presentation of the prototype.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, HTML, CSS, Prolog

Web & APIs: React, Node.js, Express.js, REST APIs, HTTP, CRUD

Databases: PostgreSQL, MongoDB

Developer Tools: Git, GitHub, VS Code, Eclipse, Postman

Software Engineering: Agile/Scrum, Data Structures & Algorithms, Debugging, System Testing, UML, MVC, MVVM
